Gallery walk — Unit 2 claim posters

Name _____ Period B Fri 11/13 My poster: #___

Visit each poster except your own. At each one:

1. Write the claim in five words.
2. Circle the verdict.
3. Find the number the claim really depends on, on your own: a fraction and a percent. Is the poster's number the same? At poster 6: count the dots at 6 or more, then divide by all the dots.
4. Write the key word the poster used: given · independent · mutually exclusive · simulation.

Poster	The claim in five words	Verdict	The number it really depends on (your work)	Key word
#1 Who wants to be rich?		supported · partly supported · not supported		
#2 The flipped headline		supported · partly supported · not supported		
#3 Can't happen together, so unrelated?		supported · partly supported · not supported		
#6 Rigged coin?		supported · partly supported · not supported		

Which claim seemed true to you at first? Why?

One thing I would add to poster #___:

What makes a claim about chance worth believing? Use one poster as your example.
